Company Representatives at AMERICANA 2013:

Monica Brandt, Chief Operating Officer

Company profile:

AvGro offers a series of organic soil amendments that directly address the soil and water needs of agriculture production, soil remediation, and coastal restoration. Our products are designed to transform damaged soil into productive land and to reduce dependency on synthetic fertilizers. Application of our mineral based product to land has no limits and will be effective regardless of the soil composition. The technology is also adaptable to varying climates.

Products Line(s):

- AvGro CROP/TURF, an organic soil additive.
- AvMin, a mineral feed supplements for livestock.
- Av20, an organic mineral based product line that create healthy water environments and curb algae growth.

Objectives(s) at AMERICANA 2013:

- Connect with distributors and joint venture partners seeking organic solutions that will optimize their products.
- Establish contact with companies and organizations that work with relevant government agencies (agriculture and environment).
