Company Profile:

Based in Wisconsin, Schunk Graphite Technology (SGT) offers its North American clients a complete line of carbon and graphite materials, carbon fiber composites and technical ceramics all while using state of the art manufacturing practices. SGT's strength lies in its ability to offer solutions to complex problems and demanding applications by selecting and matching products and materials to meet specific requirements.

Product Line(s):

SGT offers a complete range of carbon and graphite, fiber composite and silicon carbide ceramic materials for various commercial applications in automotive, high temperature products, power tools and appliances, industrial motors and fuel cell plates.

Objectives at CanWEA 2012:

- Seek to establish distributor(s) / wholesaler(s) in Canada.
- Look for established O&M companies in the Canadian Wind Market.
