Company Representative at the 23rd World Mining Congress:

Michael Bryant, Co-Founder

Company Profile:

AIR802 is a manufacturer of wired and wireless related products for use in a variety of sectors. They are noted for quality products, strong ethics, the ability to ship rapidly, excellent customer service and the ability to customize and fabricate products. Their products are used around the world, including in Canada, Mexico, South America, the United Kingdom and Australia.

Product Line(s):

AIR802 provides a wide range of products, such as antennas, cables, connectors and power-over-Ethernet (PoE) products. Companies in the mining sector have shown particular interest in DC-to-DC converters with PoE output, as well as certain antennas. AIR802 has also started production on their CA610LF75 leaky feeder cable, for use with VHF communications in mines.

Objectives(s) at the 23rd World Mining Congress:

AIR802 is seeking either direct end-user customers or aggressive distributors focused on wired and wireless technology with strong financial ability and market coverage. They are also looking to build their presence in Quebec and Canada by meeting with representatives from various mining companies.
