## **Company Representatives at the 23<sup>rd</sup> World Mining Congress:**

Paulo Pereira, Mining Director

Daniel Daoust, District Sales Manager

## **Company Profile:**

Gates Corporation is a leading manufacturer of hydraulic and industrial hose, couplings and power transmission products, such as belts, pulleys and idlers. Employing over 15,000 people across 106 locations in 30 countries, Gates is committed to developing safe, forward-thinking products, services, systems, and solutions, as well as fostering long-term customer and employee relationships.

## **Product Line(s):**

Gates features a complete line of MSHA-approved (and SAE-recommended) constant and variable pressure hydraulic hoses and couplings rating up to 8,000 psi and a complete line of state of the art power transmission belts, pulley and idlers. These product lines have been extensively used and proven to increase productivity, profitability and safety at underground and surface mines around the world and at the OEMs that service and supply them with mining equipment.

## **Objectives(s) at the 23<sup>rd</sup> World Mining Congress:**

Gates is seeking to develop business relationships with end users in Québec and Canada, particularly mining companies and mining OEMs.
