Company Representatives at the 23rd World Mining Congress:

Gregory Smith, President

Walt Smith, Vice-President & General Manager

Company Profile:

Aetna Insulated Wire is a vertically integrated manufacturer of insulated copper cables specializing in deep shaft mining solutions. They have been supplying and manufacturing premium performance wire and cable for over 85 years and are committed to providing a superb quality product and superior customer service. They are recognized for their innovation, dependability, fast service and flexibility in meeting their customer's most specialized requirements.

Product Line(s):

Aetna will be promoting its line of cables (Safe-Tek) for mining projects, from 600 volts to 46 kilovolts, specifically for deep shaft applications. They subject all products to rigorous testing and inspection to ensure thorough quality control. All cable is manufactured to standards that not only meet, but exceed industry requirements.

Objectives(s) at the 23rd World Mining Congress:

Aetna is looking to meet with distributors, wholesalers and end users in the mining and mining-related industries, specifically deep shaft mine companies.
