Company Representative at the 23rd World Mining Congress:

Andy Ghadban, Global Program Manager

Company Profile:

BlueScope Buildings provides engineered building solutions. With 25 manufacturing facilities worldwide, BlueScope Buildings is able to serve international clients in completing challenging projects across the globe.

Product Line(s):

BlueScope Buildings is a building solutions company providing the design, manufacture, and marketing of metal building systems for industrial and commercial construction. BlueScope Buildings offers consistent quality, accelerated scheduling and completion, and an integrated supply chain enabling you to control all elements of your project. Through BlueScope Buildings industry-leading brands, Butler® Building Systems, Varco Pruden® Buildings, EcoBuild™, Probuild™ and BlueScope Construction, BlueScope Buildings are uniquely positioned to support the global facility expansion plans of corporations and multi-national companies around the world.

Objectives(s) at the 23rd World Mining Congress:

BlueScope Buildings will be looking to meet with engineering, procurement and construction management (EPCM) firms, mining supply and services companies, and mining companies' decision makers. Companies would ideally be large, multi-national firms in good standing and in good financial position.
