Company Representatives at the 23rd World Mining Congress:

Chris Adair, Regional Business Manager

Lisa Drabiak, Regional Sales Manager

Company Profile:

Clariant Mining is one of the world's leading suppliers and manufacturers of specialty chemical technologies and integrated services for the mining industry. Their diverse team of experts innovate top-notch performance chemicals for mineral processing, explosive emulsifiers and fertilizer additives that provide unique solutions for mining challenges in some of the most remote places on earth.

Product Line(s):

Clariant Mining as a specialty chemical supplier to the mining industry is unique because:

- they have solutions across a wider array of the mining value chain
- they have superior knowledge of and solutions for most ore types
- they are a global organization with mining labs, manufacturing and technical sales support in nearly every mining region in the world

Their key application spaces include: explosive emulsifiers, froth flotation collectors and frothers, aids for filtration, dewatering, pelletizing, and dust control.

Objectives(s) at the 23rd World Mining Congress:

Clariant Mining is interested in developing new sales opportunities in the mining industry in Canada and Quebec. They would be interested in meeting with mine operators and/or suppliers of unique organic chemicals which they could incorporate into their formulations, namely producers of dialkyl-thiophosphates, dialkyl-dithiophosphates, thiocarbamates, fatty acids and alcohols, and bottoms from distillation.
