**Company Representative at the 23<sup>rd</sup> World Mining Congress:**

Tom Hickey, Project Development Manager

**Company Profile:**

Water Services Inc. (WSI) is a manufacturer and distributor of innovative water treatment products and services for sewage, potable, grey water treatment modules, pumps, aerators, ultraviolet sterilization, chlorination, filtration, etc. They provide equipment and services to the mining, oil and gas, military and other sectors in remote locations in Africa, South and Central America, the Middle East and other locations.

**Product Line(s):**

WSI is promoting their line of innovative water treatment products and services, which allow end users to have the drinking water they need for their remote camps and sites and treat the sewage to Canadian, U.S. and E.U. standards, enabling them to operate remotely in compliance with home standards.

**Objectives(s) at the 23<sup>rd</sup> World Mining Congress:**

WSI is looking to meet with end users and prime contractors operating in the mining industry, particularly those in remote environments. Representatives should have a technical understanding of water basics.
