**Company Representatives at CIM 2015:**

Laurie Roberts, Director of Marketing, Mobile: (304) 851-6891  
Steve Dixon, Chief Operating Officer, Chief Engineering Officer, Mobile: (301) 616-0149

**Company Profile:**

Thermo-Tech has 31 years of experience eliminating freezing issues in the mining, quarrying and power generation industries. Thermo-Tech offers one of a kind heating/de-icing systems for conveyor belts and related components such as rolls and pulleys, as well as hoppers, bins, and chutes used in mining, quarrying and power generation. These industries experience freezing issues that typically require substantial additional labor and energy costs and cause downtime and lost production which Thermo-Tech's heating/de-icing systems eliminate. Thermo-Tech provides consulting services and can create custom heating/de-icing solutions for almost any application where off the shelf equipment is not ideal or feasible.

**Product Lines:**

Specialized heating/de-icing equipment replaces significant labor required during sub freezing temperatures.

Features include:

- Replaces makeshift equipment with safe, properly designed and energy efficient heating/de-icing systems.
- Replaces antifreeze systems and eliminates associated environmental hazards, complications and expenses.
- Eliminates down time and lost production. Sustains production time and revenue during subfreezing temperatures.

**Objectives(s) at CIM 2015:**

To find an Agent or Sales Representative, end users, system engineers and installers with:

- An ability to speak English
- Knowledge of material handling, transfer and storage; electrical applications; heating equipment; and system engineering and mining and quarrying operations/production.
