Company Representatives at CIM 2015:

Nick Lugo, Business Development, Mobile: (914) 255-1504

Company Profile:

Since its creation in 1973, OC Lugo has represented the needs of its North American clients through the quality and service of its global suppliers. This symbiotic partnership between client and supplier was the cornerstone of founder Oscar Lugo's vision. Oscar recognized the key role that a distributor could play in the development of new markets for overseas chemical producers. Oscar realized that internationally based chemical companies did not have effective means of penetrating the North American market. OC Lugo became the conduit between a global network of top chemical suppliers and North American clients in need of high quality, safe and reliable chemical products. In doing so, Oscar came to provide his North American clients with the best chemical suppliers the world had to offer.

OC Lugo has grown into a manufacturing operation for the production of emergency chemical oxygen candles while continuing to meet the needs of the military, petrochemical and marine markets through its chemical distribution unit. To this day, Richard Lugo, Oscar's son, and his staff travel the globe to carefully select suppliers in order to provide their customers with superior chemical products. For over 30 years, ensuring customer satisfaction with every transaction has been the cornerstone of OC Lugo's success.

Product Lines:

The OCLugo Co. manufactures emergency oxygen systems for enclosed environments including mines, safe havens, and submarines. Our product uses a block of manufactured chemistry, burned in a furnace, and can be designed to produce various volumes of pure oxygen at a fixed rate for one hour. Our product is efficient, cost effective, safe, and a green technology. Our product is 100% US made and has over half a century of successful use behind it. We also provide a number of Catalysts for the removal of Carbon Dioxide, Carbon Monoxide, Ozone, and V.O.C.s, as well as other air borne contaminants.

Objectives(s) at CIM 2015:

To find a Distributor, Wholesaler, or engage in Direct Selling to the Canadian region with:

- An ability to speak English
- An ability to act as translators and facilitators for meetings with mining and safe haven personnel
