Company Profile:

Perry Baromedical is a distinguished and internationally recognized brand name, and a registered medical device manufacturer based in South Florida. Perry has a history of more than 50 years of design innovation and quality manufacturing, installation and service of hyperbaric oxygen therapy systems. Hyperbaric Oxygen Chambers are United States FDA Class II devices and are controlled by federal law. Perry is the only full line manufacturer in the industry, with its product line encompassing monoplace and multiplace systems. The Company sells its products to Hospitals as well as free standing medical clinic programs. Perry has installed over 1,000 systems in more than 30 countries and its equipment has successfully completed over 4.5 million patient treatments.

Products:

- Mono-place hyperbaric oxygen systems: Sigma 34 (33.5"), Sigma 36 (36") & Sigma 40 (40.5") and one dual-place model Sigma 40-II (40.5")
- Multiplace Hyperbaric Chambers (MP-6, MP-8, MP-10 and MP-12 models)

Objectives(s) at Health Achieve 2016:

Perry Baromedical is looking to meet with clients, hospital administrators and private clinic owners. In particular those involved with wound care and other hyperbaric oxygen indications, including specifically vascular, plastic and orthopedic surgeons, as well as oncologists and neurologists.
