Company Profile:

True Process is a Wisconsin-based provider of clinical data solutions and strategies. For medical device and software companies, we specialize in delivering top-tier implementations, integrations and support systems for their products. Drawing on our vast experience and employing agile development methodologies, we offer unique expertise and solutions for companies developing and deploying products for the clinical/ biomedical environment. Additionally, True Process develops innovative software with our ViNES® and VeriScan™ products.

Services/Products:

- Design and strategy for medical devices/systems
- Software engineering
- Medical device integration (MDI) & connectivity
- ViNES® (Medical Software Product) – biomedical device integration application suite capturing, storing, and routing high-resolution data from biomedical devices
- VeriScan™ – Barcode medication administration system (BCMA) for closed loop bedside medication administration
- Service delivery design
- Device/system implementation

Objectives(s) at Health Achieve 2016:

- To develop contacts with healthcare organizations, research institutions, and medical device/software manufacturers
