

UNITED STATES DEPARTMENT OF COMMERCE
International Trade Administration
Washington, D. C. 20230

U.S. ORIGIN CLAUSE

It is the policy of the U.S. Department of Commerce to promote products at overseas trade shows only of those U.S. companies whose products or services are labeled “Made in USA” or, if not so labeled, have at least 51 percent U.S. content. The percentage of U.S. content can take into account material, labor, equipment and factory overhead, R&D, design, and intellectual property, as well as U.S. sourced administrative, marketing, sales distribution and other costs that can be appropriately allocated to the exported product or service.

If your products are not marked “Made in USA,” please complete, sign and return to us the following statement.

Our products are “Made in _____ (specify country),” but I affirm and certify that the products to be promoted in the American Product Center at INTERZOO ’08 have a minimum 51 percent U.S. content based on the following factors (for each, provide approximate percentage of the U.S. FOB export price):

- _____ U.S.-sourced materials/components/packaging, etc.
- _____ U.S.-sourced labor (e.g., final assembly and/or packaging in the U.S.)
- _____ U.S.-sourced production equipment and/or factory overhead
(e.g. American production equipment used in overseas production and/or U.S. factory overhead for final assembly/packaging, etc., in the U.S.)
- _____ U.S.-sourced research & development
- _____ U.S.-sourced design
- _____ U.S.-sourced intellectual property (patent, trademark, copyright)
(e.g. the fair-market royalty if it were manufactured under license)
- _____ U.S.-sourced sales/distribution costs (for exported products only)
- _____ U.S.-sourced advertising/marketing costs (for exported products only)
- _____ U.S.-sourced administrative costs (for exported products only)
- _____ other U.S. sourced costs which can be allocated to exported product.
(describe: _____)

Company name: _____

Name & title: _____

Signature: _____ Date: _____
