

THE CENTER FOR UAS IN THE U.S.

UAS Central is America's top place to grow. It's a unique place to get funded, recruit top talent, test your technology and collaborate. You need a place like this: a place teeming with creative leaders and policy influencers; a home to multi-million-dollar competition and incubators with demonstrated success.

We can provide opportunity - with plenty of grants dedicated to building your workforce and infrastructure. And with 81 colleges and universities within a 100-mile radius, we help recruit hard-to-find talent, while also drawing on the minds of academic leadership in the unmanned aerial systems space.

Our vast network of industry experts provide the knowledge of hundreds of organizations to guide you.

UAS Central has world-class instrumentation for real-world application and testing. We bring NASA, FAA and other industry partners together in this four-season region full of wide-open spaces.

Our unrivaled expertise and experience allow us to help startups and innovative businesses navigate through the obstacles of the regulatory framework. Whether its measuring airworthiness, testing platforms and payloads, or helping research and development of UAS, we have the resources to meet any customer requests.
